

Syringe Driver bags

Springhill
Hospice
Making every moment count

Materials

- 2 pieces of cotton or polycotton fabric cut 35cms x 25cm
- 2 pieces of lining fabric (plain or patterned) cut 35cms x 25cms
- 1 piece of fabric for strap 150cm x 12 cms
- Matching thread

Syringe Driver Bag – instructions

Strap

- Press the fabric to the wrong side by 1.5cm on all edges of the strap
- Fold the strap down the centre and press, making sure the long folded edges meet neatly and that the short edges are tucked in
- Using a 1 cm seam allowance, stitch right around the strap

Bag

- With right sides together (rst) stitch the long edges of the bag and across the bottom, with a 1.5cm seam allowance
- Trim a triangle from the bottom corners
- With lining fabric (rst) sew the long edges together, leaving a 10 cm gap at the bottom to turn through the bag
- Trim a triangle from the bottom corners
- Turn the outer bag right side out and pop it into the lining
- Line up the side seams and pin the strap in place, ensure the long edge is the same side as the right sides of the fabric and the short edge is trapped between outer and lining fabrics. Using a 1.5cm seam allowance, stitch the tops and strap together
- Pull the bag through the gap in the lining and press
- Locate the gap in the lining and press turning in the seam allowance, edge stitch to close
